

# 30,000 to 100,000 "Militants" have Joined the Islamic State from the EU

And smuggling "mafias" proliferate in Spain. From [Gateway Pundit](#):

The mass exodus of people by the war has brought "the proliferation of organizations that traffic in human beings taking advantage of the use of false / counterfeit documentation being introduced thousands of people in European countries," reads the report. And warning: "The problem is compounded when you consider that, using the same networks, facilitates entry with false documents to European veterans who have moved to Syria and Iraq to fight for the Islamic State (EI) and are in search and seizure by different States (Spain, France, UK, etc.) and EI members or cells that may cross our borders to act in the European environment creating terror."

The "threat" underlined by this report, which states "**between 30,000 and 100,000 militants**" from **Europe that have joined the Caliphate** of Abu Bakr al-Baghdadi (leader EI), is twofold: the proliferation of trafficking mafias persons before the stampede of civilians and the "entry of terrorist elements and return of European veterans using the same networks."
