

A vote for any Democrat is a vote for tyranny

by Steve Hecht

Democrats have become the party of totalitarianism. A vote for any Democratic Party candidate is a vote for tyranny, regardless of any candidates' assertions of independence from Joe Biden, Charles Schumer, and Nancy Pelosi.

Democracy depends on the rule of law. Democrats have [politicized](#) justice as never before in our history. The Justice Department (DOJ) and FBI persecute political opponents and protect their allies and leaders regardless of evidence or law. This is standard procedure for tyrannical governments throughout history.

The Biden regime could be the most dishonest executive in our history. They can lie as they do because their media partners promote their propaganda and suppress the truth. The Missouri v. Biden [lawsuit](#) is revealing the regime colludes with and pressures media to censor news.

The FBI acted on behalf of Biden in the 2020 election

by [suppressing](#) the Hunter Biden laptop story as Russian disinformation. The evidence indicates Joe Biden has been active in foreign influence peddling that gives foreign adversaries leverage over him. The DOJ protects Biden, as do congressional Democrats and their media partners.

Corporate America—the owners of most of the legacy media—and Wall Street have sided with Democrats because America-first policies reduce their profits from China. Therefore, Democrats can substantially outspend Republicans in campaigns despite their unpopular policies that have produced chaos, violence, and inflation.

The Chinese Communist Party's (CCP) hybrid of capitalism and totalitarianism creates little and depends on forced transfer of technology and espionage to keep up with the United States. This unsustainable arrangement cannot survive unless our government becomes like China's.

China permits US companies to reap excess profits from labor without rights and some outright slave labor, like the Uighurs. In essence, the CCP pays our oligarchs to betray us. Peter Schweizer details this in [Red Handed: How American Elites Get Rich Helping China Win](#). He shows how the CCP provides former and current high officials from both parties incentives to promote their agenda.

Former President Donald Trump knows China cannot compete with us on a level playing field. His policies that favored Americans are why the oligarchs and federal bureaucrats teamed up with the Marxists who control the Democrat party to remove Trump from power.

Trump showed that lower corporate taxes, fewer regulations, and reciprocal trade deals help all sectors of society. Investment and jobs returned, which globalist leader Barack Obama said in 2016 could not happen.

Globalists demonize as a nationalist or fascist any leader who

opposes globalist dogma. Examples are national leaders Liz Truss (recently resigned), Victor Orban, Giorgia Meloni, and Jair Bolsonaro. Globalists oppose individual liberty and free markets. They want central control and collectivism, including for Americans.

Globalists squeeze out small businesses, the engine of our economy. They exploit cheap foreign labor, while making people at home dependent on government largess. To continue this, globalists must deprive us of our individual liberties and suppress the truth. Their goals and methods coincide with those of the CCP.

In an attempt to maintain their power, Democrats and RINOs call America-first Republicans extremists. That demonizes anyone who believes in timeless American principles: liberty, rule of law, and free, competitive markets. Without oligarch money and regime media, Democrats would win no elections with their current policies.

Voters should not be deceived by Democrats who claim independence from the party. The Biden puppeteers use oligarch money to threaten with primary challenges any Democrat who strays from the party line without permission. They have permission from party leaders, for electoral purposes, to lie about their independence, but not to vote independently. If such candidates were telling the truth and believed in liberty, they would leave the party, as Tulsi Gabbard did.

In Florida, for example, Democrat Representative Val Demmings is running against Republican Senator Marco Rubio. She [uses](#) her police-chief experience to claim she is a “tough-on-crime leader who knows how to keep our communities safe.” Demmings has [voted](#) 100 percent with Biden. Democrats have proved they are anti-law enforcement and pro-crime throughout the country. Demmings has shown she will not buck party dogma at voting time.

Democrat Corinna Robinson is running for the US House in Florida's 21st district against incumbent Brian Mast. She claims she [wants](#) investment for small and family businesses. This is counter to Democrats' favoring their oligarch partners, so it is just words without substance.

Candidates who promote current radical, antiliberty Democrat policies and lies will soon find that does not work. For example, Christine Olivo [promotes](#) a pathway to citizenship for all immigrants. Annette Taddeo on her website [calls](#) climate change an existential threat, fails to mention law enforcement, and says January 6 was a threat to democracy.

Olivo and Taddeo are running against incumbents Mario Diaz-Ballart and Maria Elvira Salazar in Florida's 26th and 27th US House districts, respectively. Salazar [told](#) the Faith and Freedom Coalition conference, "We (Hispanics) come to America to escape tyranny, not to bring it with us."
