

Biden's most cynical and disgusting political ploy

by Bill Corden

[U.S. approves cluster bombs despite humanitarian concerns \(msn.com\)](https://www.msn.com)

A supposedly civilized nation approves the transfer of munitions that indiscriminately kill bystander civilians.

Even Afghanistan and Palestine don't allow these horrific weapons.

It's only been done because The States can't keep up the

supply chain with single use ammo and they have a huge stockpile of the cluster bombs.

There's no way that Donald Trump would have allowed this, in fact there would be no war if he had managed to retain power. Everybody should pray that he gets back in and puts an end to the debacle that is this administration.
