

Combating 'Systemic Racism' in America

How to bring about true equity.

by Armando Simón

It is understood by everyone that America is, and always has been, a racist country where there is no possibility for a black person to become an actor in television or movies, a businessman, a college professor, an athlete, a judge, a police chief, a mayor, a Congressman, a Senator, a Supreme Court Justice, much less the President of the United States. [The 1619 Project](#) has eloquently proven this fact.

Systemic racism is entrenched in every aspect of American society, even in the most seemingly insignificant element, which only a sophisticated progressive can detect. The following are some of the many, countless, racist elements in

society, as pointed out by enlightened progressives (I beg the reader's indulgence in my recitation of them, but it is in order to raise awareness of the systemic racism in American society):

A lot of things are inherently racist. For instance, maps. [Maps](#) are racist. So is [football](#). And [Shark Week](#). [Fields](#) are [also](#) racist. Working [out](#) at the [gym](#) is racist. [Swimming](#) is racist. Daylight savings [time](#) is racist. Let us not forget that airlines charging [more](#) money is racist. Climate [change](#) is racist. So is the [lottery](#). There is a [tinge](#) of racism in private schools. [Museums](#) are racist. Books by Dr. [Seuss](#) are racist. The seeking of objective truth and [facts](#) is racist. Using one's [hands](#) while speaking is racist. [White](#) marble, used in sculpture, is racist. Using mathematics in art, such as the [Fibonacci](#) ratio, is racist. [White](#) milk is racist. The word "[obesity](#)" is racist. [Truth](#) is racism. [Silence](#) is racist. Tamarisk [trees](#) are racist. [Algorithms](#) are racist. A coin [toss](#) is now racist. [Computers](#) are racist. Pumpkin [spice](#) lattes are racist. Eating a healthy [diet](#) is now a sign of racism. The Christmas song, *Jingle [Bells](#)*, is racist. [Pancakes](#) are racist. [Knitting](#) is [racist](#). Pedestrian [signs](#) are racist. If you don't wear a face mask inside a classroom, that is a [sign](#) of racism. [Apple](#) pies are racist. Citing the statistic that blacks are 13% of the population but commit over 50% of the crimes is racist. The [GOP](#) is the party of white supremacy. The bird [known](#) as McCown's Longspur is racist. Calling the [Asian](#) carp the "Asian carp" is racist. [Math](#) equals [white](#) supremacy because it requires a right answer. [White](#) paint is racist. The number 8 is a racist [number](#). If you are a student, raising your [hand](#) in class is racist. Teaching [grammar](#) is a sign of racism. [And](#) it goes without saying that [astrophysics](#) is racist. [Peanut](#) butter and jelly sandwiches are racist. [Chess](#) is racist because white moves first. [Soap](#) dispensers are racist. Free [speech](#) is racist and should be eliminated as is being done in Canada and

Europe. And, of course, [owning](#) property is racist.

As can be seen from the above, the evidence of racism in America is everywhere. We have a lot of work ahead of us.

So that in order to bring about an equity society where whiteness is eliminated and where whites have no rights so that we can achieve equity, we will have to restructure society through the lens of Racial Marxism. Foremost of these changes would be on the matter of reparations whereby white persons who have never owned slaves will be forced to give huge amounts of money to black persons who have never been slaves in order for the former to atone for their sins (the exception would be for those persons from Africa and Asia who still own slaves when they migrate to this country; since owning slaves is part of their culture, it is permissible). This would be a variation of the goal of redistribution of wealth.

Next, in order to have a more diverse and equitable representation in fields like engineering, medicine, law, etc., the standards for qualifications must be dropped to the lowest common denominator, as is already the case for entrance to many Ivy League universities.

Likewise, we must have an increase in representational characters in films and television, even in historical movies. We have already seen black actors representing Vikings, Ancient Greek heroes, Victorian England characters, etc., but we need to have more of them.

Ideally, our goal should be legislation whereby black votes should count ten times that of whites. It would also be illegal to contradict or criticize blacks. Most importantly, police would not be allowed to arrest a black person who is suspected of breaking a law unless that black person wishes to accompany the police.

But, until we achieve those idealistic goals, in order to set

up the groundwork, we must continue to teach critical race theory in schools at all levels, in all its variations, while denying that this is taking place (after all, conservatives are too stupid to realize the slight of hand, and too lazy to persist in preventing it, being easily distracted) since the next generation will produce results.
