

Despite Western Entreaties Saudis Keep Blockade On Yemen

Here.

Compare the quiet entreaties – not made publicly – about this total blockade of tens of millions who hardly threaten the well-armed Saudis (and certainly had not been sending tens of thousands of missiles into Saudi cities), to all the noise made about the very loose pseudo-blockade – really, just a denial of materials, such as cement, that have been put to military (tunnel-building) use, by Israel at its part of the border with Gaza, while food and medicine and water do get through, and electricity supplied as well from Israel to “blockaded” Gaza.
