

Erin Moran, Courageous Aussie Journalist, and the Hamas Nightmare...

by Gerald A. Honigman

I found the following Erin Moran video on [IsraPundit](#) related to the barbarism Israeli Jews are repeatedly subjected to by their assorted Arab neighbors...

Wasn't the brutal kidnapping and killing of a mother, baby and toddler enough for these sadistic evil terrorists?

I can't comprehend what I just watched occur...

My raw, unpolished, unscripted thoughts.

It's time.

Destroy them. pic.twitter.com/FL89fHaa8G

– Erin Molan (@Erin_Molan) [February 20, 2025](#)

My only critique is that Erin's moving response to this butchery and depravity left out one very important ingredient:

Arab children killed in this nightmarish war sired by Hamas—an organization which was elected to power by their own parents and whose very charter calls for the total destruction of both the sole, resurrected, minuscule nation of the Jewish People and the people themselves—tragically die because their cowardly “heroes” routinely hide behind them and other innocents.

And on that latter note, evidence increasingly shows that too many of those “innocents” gleefully partook in the bloodlust of Simchat Torah, the Biblical holiday commemorating the giving of the Torah (1st five books of the Hebrew Bible, aka “Old Testament,” including the Ten Commandments), on October 7, 2023.

There is absolutely no moral equivalency here.

One child is deliberately targeted, beheaded, disemboweled, burned alive, and whatever by monsters, and the other dies because of a supremacist, rejectionist Arab mindset which teaches its people from kindergarten on up that only Arabs have any rights in all of the Middle East and North Africa ... what they typically refer to as “purely Arab patrimony.”

And anyone who resists—be they Kurds, “Berbers” (the Amazigh and Kabyle people of North Africa), Copts, Assyrians, pre-Arab conquest Lebanese, Jews, and so forth—is slaughtered.

Recall that over one half of Israel's Jews, the Mizrahi and Sefardi, are from refugee families who fled for their lives from the so-called “Arab” world ... numerically more than their Arab refugee counterparts. (For a better understanding of all of this please see “[Berber Autumn](#).”)

An earlier [analysis](#) inadvertently served as a prequel to this current Hamas-sired tragedy in Gaza and Israel. It contains, among other things, the relevant articles of the Geneva Conventions on War which Israel operates under.

This [article](#) (and this [one](#)) are penned by one of the world's leading military experts on urban warfare who describes what Israel has been up against pursuing the butchers of its people, and who deliberately embed themselves among their own non-combatants to cause them harm for public relations purposes ... hiding in schools, hospitals, mosques, apartment buildings, and so forth.

Lastly, here are some ideas about what needs to be done to effectively end, as best as possible, this ongoing nightmare which Israel has been subjected to since its rebirth on less than one half of one percent of the Middle East and North Africa. Note as well that I've done extensive doctoral work in both Middle Eastern and National Security Policy Studies:

"Measure Gaza, empty it of Hamas, stay for as long as necessary ... Name any war in history, and see if border changes didn't occur as a result." ([Israel National News](#))

May the precious souls of the Bibas Family and too many others like them rest in peace ... and may the IDF do whatever is necessary to try, as best as humanly possible, to eradicate these subhuman monsters once and for all.

Thank you, Ms. Moran, for your much needed support when so many others in your profession have lost their moral compass and blame victims instead of their tormentors.
