

# Is Sharia Law Compatible With US Laws and the US Constitution?

by Gary Fouse

Currently, many states are attempting to pass-or have passed-legislation which would preclude other forms of law being incorporated into state law. To be specific, the particular law they are trying to avoid is Islamic law-sharia (though they must avoid specifically targeting Islamic law as opposed to those of other religions). Correspondingly, Islamic leaders in the US are trying to combat this trend and prevent said laws from being passed. On one front, Muslim leaders in the US are involved in a public relations drive to convince non-Muslims that sharia law is [perfectly compatible](#) with the US Constitution and US law. It is not, and it is very easy to prove it.

Sharia in Arabic means, "straight path." In the early time of

Islam it referred to the straight path to water, life's necessity. Since Islam is designed to guide virtually every aspect of the believer's life, sharia is quite detailed. Its two main sources are the Qu'ran and the Sunnah (sayings, actions and approvals of the Prophet Mohammad). Its interpretation through the centuries has come from the learned Islamic scholars.

Much of sharia is benign and related to principles of how one worships, marriage, divorce, financial rights etc. There are also civil and criminal aspects and punishments for criminal violations. Aside from the obvious discriminatory details regarding women and non-Muslims, it is in the area of criminal punishments that sharia is most problematic.

This past weekend, I attended a
