

Melbourne, Australia: Bengali Muslimah on Student Visa Stabs Her Kuffar Host in the Neck

She was wearing a burka. She struck on a Friday afternoon... had she been to the 'ladies prayer [sic] hall' of some nearby mosque, before the attack? And, exactly as per the Quranic instructions in Surah 47.4 – "When you meet the unbelievers, strike at the necks..." – she struck at his neck, causing serious neck and shoulder injuries (luckily, she did not manage to kill him; he has undergone surgery, and the reports indicate that he will survive.)

Meanwhile, everyone officially supposed to be investigating is tying themselves in knots to avoid seeing the flaming obvious; to avoid seeing that this vicious attempted murder – the victim was asleep when this hell-cat in her black Allah Gang Uniform sneaked up on him and tried to slit his throat – has everything, but everything, to do with Islam, Islam, Islam., the religion of blood and war. They have had to admit – possibly on her own declaration – that she was inspired by "Islamic State"... but none of them have read Ibn Warraq, to grasp that Islamic State is simply following the rule-book of.. Islam.

As reported just today by the ABC and by commercial TV (Channel Nine).
