

Missed chances to strike Iran's nuclear programme

By Gerald A Honigman

Israel caved in to American pressure to not act in its own existential interests, from Obama, Biden & Trump as well...

Unlike a 3,000 mile wide America with a vast ocean separating it from an Iranian nuclear threat, Israel is so close to the genocidal mullahs that hundreds of powerful ballistic missiles and other devastating projectiles and drones have already targeted innocent Jewish civilian population centers in an Israel 9-15 miles wide in its narrow waist, where most of its population is crowded into like sardines in a can.

The following analyses deal with what needs to be done to prevent genocidal 12'er Shi'a Iranian Islam isr mullahs, who don't even identify with Iran's amazing pre-Islamic glorious history (and who are despised by most of Iran's people) and who seek total world calamity in order to usher in the return of their 12th "hidden " imam, the Mahdi (like the Messiah) to restore order, and openly declare the complete annihilation of the sole, minuscule, resurrected nation of the Jewish People and world hegemony as their main goals, from acquiring nuclear weapons.

While this problem affects the entire world, the predicament Israel is now faced with is dangerously unique. Iran calls Israel the "one bomb entity"— Guess why..

This frightening situation is the price a small nation pays for not being able to make its own existentially crucial decisions because it's too dependent on luke warm friends for weaponry and on again / off again political support...

Iran vociferously clamors for the creation of a 22nd state for

Arabs via the destruction of the reborn nation of the

Jews, while suppressing, hanging, jailing members of its own 9 million or more Ahwazi ARABS in western Khuzestan province, where much of its oil is located. Iran and Iraq fought a costly, horrendous war in the 1980s over Khuzestan/

Arabistan real estate.

That 22nd Arab state the mullahs, most Arabs, and the rest of the world demands would be their SECOND, not first, in the original April 25, 1920 Mandate of Palestine. Today's Jordan was created by Great Britain lopping off almost 80% of the entire territory in 1922.

If the Mandate of Palestine could undergo partition to accommodate the rights of Jews and Arabs, the Indian subcontinent divided to do likewise involving Hindus and Muslims, etc., why can't such a demand be made to create another, independent Arab nation in Iran?

I'm simply throwing this idea out hypothetically to illustrate the blatant duplicity which is evident here. Are the West's Arab useful idiots and antisemites paying attention?

The least that Ahwazi Arabs should have is some sort of federated regional autonomy— as should Iran's 5-6 million Kurds and other ethnic groups as well— all oppressed by the Islamist mullahs.

See this [next analysis](#) with its accompanying You Tube to discover the utter hypocrisy of the would-be atomic

Ayatollah and his fellow Islamist mullah oppressive mullahs:

Here's a ["laid back" You Tube](#) I made on this very topic with the help of my dear friend, Jim Long.

Themes related to the quest for justice in the Middle East – You Tube topics covered in the author's book.

Source: YouTube: "Why Palestine but not Arabistan?"

Has the world even heard anything about these Arabs, who live in a part of Iran which was called Arabistan for a few hundred years before the dawn of the Pahlavi Shahs.

While Trump's fellow real estate billionaire, gullible and easily manipulative point man on the Middle East, Steven Witkoff is lured into stalling and maneuvering games, with deliberate lying for their cause–taqiyyah–to kafir America Infidels in sham "peace talks," Iran is building closer alliances with America's main enemies, Russia and China, who've pledged to support the Iranian mullahs militarily and financially as well.
