

PENTAGON'S UFO DEBRIS: STUDY MANAGER FOUND, ET CONNECTION CONFIRMED

Anthony Braglia [here](#): And when the Pentagon “backpedaled” that the documents actually concerned a weapons program, a rebuttal to that was made in a follow-up article that can be found [an internal email](#) that shows just how “orchestrated” and deceiving the Defense Department can be when it comes to UAPs (UFOs). The July 10, 2020 email is from Joe Gradisher, the Deputy Chief of Naval Operations for Information Warfare, to Jeff Jones of the Navy Office of Information. Gradisher warns Jones about how to reply to UFO/UAP related Freedom of Information Act (FOIA) requests. In the email, reproduced here, certain excerpts stand out:

“...from a Public Affairs perspective, all media inquiries on UAPs go to DOD Public Affairs, Sue Gough (cc'd) ... keeping in the loop, as we coordinate closely. To date, we have not authorized any media interviews on the subject. Make no comment. The nuances of all this are such that any deviations from the statement that DOD makes result in multiple news stories and additional FOIA requests at various levels. If we need to, we'll coordinate with you on specific responses, depending on the questions asked.”

“Also, generally speaking, we let the normal FOIA process work as it is supposed to but we have been requesting that FOIA offices coordinate with us on UAP-focused FOIA responses before they hit “reply” so that new terms/language/etc. aren't introduced that complicate the overall messaging efforts. Additionally, there is now a Security Classification Guidance document (at the SECRET) level, that addresses the UAP issue and what may/may not be discussed publicly. Happy to get that to you if you see the need.”

Sue Gough, referred to in the email, is the very Pentagon spokesperson who has contradicted the DIA in saying that the FOIA documents released to me, instead of being related to UFOs, related to weapons research. Gough has had a demonstrated and long history of issuing conflicting and confusing statements on UFO/UAP matters.

When one breaks down the salient points of the email, one is appalled at the FOIA games that are played when it comes to UFOs/UAPs:

- UAP-related FOIA inquiries are to be treated with a different process than the normal FOIA process.
- FOIA offices must coordinate with their superior office on these FOIA requests.
- All media inquiries on UAPs are to be run through Sue Gough, Pentagon spokesperson. No media interviews have been authorized on the subject and media inquiries are to receive a “no comment”.
- If need be, particularly challenging responses to FOIAs should “coordinate” with the relevant superior office.
- There is a “guidance document”, classified Secret, that outlines what can and what cannot be said about UAPs.

Of course, all of this is very disturbing. But it does help us to know why, after replying about UFO debris tests to a FOIA request using UFO terms, the Pentagon now contradicts its own intelligence agency, maintaining that the sent documents relate to weapons.

WHAT WE ARE LEARNING

As our understanding of the meaning and significance of the “UFO Debris Pentagon Papers” unfolds, we learn that the March of Science has been stepped up by technologies from another

world. And this does not minimize the achievements of Man but rather enhances them.
