

The ISIS Chemical Biological Threat to the West: a discussion with Dr. Jill Bellamy

by Jerry Gordon, Lisa Benson and Richard Cutting (January 2016)

The Islamic State (IS) terrorism's long arm reaches out from its self-declared Caliphate in Raqqa, Syria. It broke like a thunderclap in the waning days of 2015. There was the downing of a Russian Metrojet Airbus 321 flight in the Sinai with 224 passengers and crew with a bomb secreted aboard by possible ISIS operatives on October 31, 2015. A suicide bombing by ISIS-linked operatives in the south Beirut bastion of Iran's proxy Hezbollah killed 43 on November 12th.
