

To dream the impossible dream

by Bill Corden

If things go the way they should in this election and Donald gets to keep his job, can we hope for the Kamala Harris “tell all” book coming out a few months later?

A book in which she admits that she knew all along that Biden was “non compos mentis” and that his candidacy was an empty shell.

She’ll be the Democratic equivalent of Omarosa and say that she went along with the scam in the interests of party unity. She’ll say that she was horrified by the lying and the cheating (Oh! and the Republican’s s too) but that she’s put that behind her now and wants to be thought of as the next, and still first female, President for 2024.

I say this because there’s no bottom floor for these people who are only motivated by revenge ... no thought of what’s best for the country, just what’s best for themselves.
