

We Survived Arab Terror Attack Day of UN Security Council Resolution 2334

Rafi Lisker writes:

Dear President-Elect Trump,

First, please allow me to state unequivocally and without any reservations whatsoever, that our family proudly cast our FOUR absentee ballots for you at the time of both, the Republican primaries as well as the General Elections. My wife, Shoshana, our eldest daughter Avital, our eldest son Yonatan (a Lieutenant in the elite Israeli Defense Forces Paratrooper Unit) and I, of course, feel truly blessed to have you as our next President!

That said, I feel compelled to share with you our own Hanukkah Holiday "Miracle" as follows:

On the night of Friday, December 23 2016 – just a few hours

before the United Nations was to pass their latest anti-Israel Resolution – namely, UN Security Council Resolution 2334 – my wife Shoshana and I were attacked by a knife-wielding Palestinian terrorist on the very street where we reside in the Town of Efrat, Israel.

FYI – Efrat has a very high concentration of American citizens such as Shoshana and I, and the attack occurred a mere five-minute walk from our home(!)

While my wife was, thankfully, able to flee for safety to the home of a neighbor, I however, sustained no less than FOUR knife wounds inflicted to my neck and upper back prior to my being able to thwart off my attacker, face him head on, and thus deter him from any further blows to my body:
